PROFILE

Aspiring web developer passionate about building web-based applications using modern technologies like React and Next.js. Familiar with Clean Architecture principles and state management. A reliable team player with good communication and a strong willingness to learn through hands-on projects.

EXPERIENCE

Exantara

2025 - PRESENT

Full Stack Developer

- Maintained code quality and repository standards by conducting code reviews and managing pull/merge requests on GitHub and GitLab.
- Integrated secure payment gateway solutions and developed custom CMS collections for dynamic content management.
- Developed, tested, and optimized core web features to support application scalability and daily operations.

World Pineapple Shop Page

2025

WordPress Developer (WooCommerce, API Integration)

- Built a custom WooCommerce shop page designed for manual order processing.
- Integrated Twilio API (WhatsApp) and Gmail API to automate post-checkout notifications.
- Streamlined order management workflows and improved overall customer response time.

Ecowood Landing Page

Backend Developer

2025

- Configured Strapi headless CMS including custom content types, media handling, and access roles.
- Developed and tested REST API endpoints for fetching dynamic news articles.
- Collaborated with the frontend team to seamlessly integrate APIs into a Next.js landing page.

Kazeem

Junior Web Developer

2024

- Developed full-CRUD employee and attendance management features with exportable PDF and Excel reports.
- Designed relational database schemas supporting many-to-many relationships between employees and roles.
- Configured custom enums for gender and attendance statuses along with complete timestamp tracking.
